Tropical Agroecosystems (TAEC)

Contents

VOLUME 2, ISSUE 2, 2021		
No	Editorial	Pages
1	EFFECT OF DIFFERENT PRE-SOWING TREATMENTS ON GERMINATION OF PERSIAN WALNUT (<i>Juglans regia</i> L.) IN RUKUM (EAST) DISTRICT, NEPAL	70-73
2	PERFORMANCE OF WINTER VEGETABLES CULTIVATION IN MANGO FRUIT TREE BASED AGROFORESTRY SYSTEM	74-78
3	INTERCROPPING CHILLI WITH GROUNDNUT IN CHAR LAND	79-81

Tropical Agroecosystems (TAEC)

Editorial

Agriculture has a key role for development throughout the world, but especially so in the tropics where many of the population are self-employed subsistence farmers, dependent on it as their only means of survival. Most temperate zone farming techniques are inappropriate for tropical areas, due to differences in climate, soils and not being geared to small-scale farming. Tropical Agriculture systems are characterized by both planned and unplanned diversity. Planned diversity includes the spatial and temporal arrangement of domesticated plants and animals that farmers purposely include in the system, along with beneficial organisms that are deliberately added. Unplanned diversity includes weedy plants, herbivores, predators, microbes, and other organisms that persist in the system after it has been converted to agriculture or colonize it from the surrounding landscape. Both types of diversity have strong effects on agroecosystem productivity, stability, pest regulation, soil processes, and the movement of organisms between agriculture and natural habitats in the agricultural landscape. Tropical Agroecosystems (TAEC) focuses on achieving efficient and environmentally sustainable crop and livestock production in tropical areas – which could ultimately help reduce hunger, malnutrition and poverty and improve the livelihoods of the people who live here. Tropical Agroecosystems (TAEC) explore topics including the main farming systems in the tropics, soil management, water conservation, food crops and cash crops, managing livestock and rural development.

Scientific Board

Editorial Team

Editor in Chief

Dr Fridelina Sjahrir
Faculty of Engineering and Life Sciences
Bestari Jaya, Selangor Darul Ehsan, Malaysia

Assoc Professor Dr Saidatulakmal Mohd
Deputy Dean (Research, Postgraduates &
Networking)
School of Social Sciences Universiti Sains Malaysia 11800
Penang, Malaysia

Managing Editor

Dr Yazmin Bustami
School of Biological Sciences,
Universiti Sains Malaysia, Penang, Malaysia

Jiban Shrestha
Scientist, Nepal Agricultural Research
Council, Agriculture Botany Division,
Khumaltar, Lalitpur, Nepal

Dr Nadirah Musa
